

About Us

The NETeXPERT Online Community (NOC) is a service to all users, partners, SRIT, and OSI employees to virtually meet online. There are blogs, articles, collateral, timelines, links, and ongoing content which will be posted to this site from OSI and users alike.

Current activity includes questions and answers on rule writing, version control, special events, user group discussions, and growing the online community. Future discussions may also lead to sharing insights on how to deal with advanced correlations, service impact, activations, closed loop control, and overall operational automation.

There will also be discussions on new next-generation domains such as IP services, broad-band DSL, IPTV, 3G/4G wireless/WiMAX, etc.

This site is maintained by OSI and NETeXPERT Support services will allow us to continue to maintain and grow this hosted site.

Founded in 1989, Objective Systems Integrators (OSI) develops and maintains its flagship NETeXPERT NGOSS framework, which is used throughout the world by leading Communication Service Providers, System Integrators, and Enterprise Institutions. The NETeXPERT NGOSS Framework is used for Service Assurance and Fulfillment solutions. Key differentiators include its flexibility, open API's, scalability, and ability to not just monitor but automate bi-directional management functions for next-generation resources and services. The OSI team is comprised of highly skilled individuals each experienced with several years in delivering complex mission-critical software systems. Our specialty is distributed Operational Support Systems (OSS) and Business Support Systems (BSS) development, deployment, and training. OSI has experience with integrating systems that require multi-protocol, cross-platform, and cross-domain functionality. Over and above NETeXPERT, OSI can provide system architecture, project management, training, design, deployment, implementation, development, product management, and marketing support. OSI has also fostered relationships with industry leading System Integrators who have invested and chosen NETeXPERT as their NGOSS framework for delivering solutions. What distinguishes us is our: * Dedication to company culture and our team members * Outstanding track record * Technical expertise * Commitment to our partners and customers
